

# Ramones Costume

Written By: Maureen Sullivan

## SUMMARY

### What you will need

Aluminum window mesh  
3 packages of artificial/acrylic hair  
1 pair of nude color stalking  
Invisible thread  
Hot glue & gun  
Fiberfil  
Foam-clay (for the eyes)  
Binding tape  
1 yard of thick yarn  
Iron

### Step 1 — Ramones Costume

- The application of hair will be a little frustrating, as it tends to go all over the place.
- Getting the "Joey-Do" just right can be achieved by using an iron set on "low/linen". The hair may get a little sticky, but don't worry, most acrylic hair is fire proof.

## Step 2

- Tommy's face was much easier to construct since he normally always wore shades.

## Step 3

- The eyes are simply made with foam-clay and then painted.
- Johnny's signature bowl haircut can be more precisely executed if straighter hair is used for his wig.

## Step 4

- Dee Dee's faces requires substantial molding to accurately represent his facial features.
- I attempted to give his cheeks a more hollow look by adding deep creases in his face.
